APPROVED PACKAGE INSERT: CARBAMAZEPINE TABLETS IP 200mg / 400mg

Brand Name: TEGRETOL | *Active Pharmaceutical Ingredient: Carbamazepine IP*
Central Drugs Standard Control Organisation (CDSCO) Approved Product Information

BOXED WARNING: SERIOUS DERMATOLOGIC REACTIONS

WARNING: SERIOUS DERMATOLOGIC REACTIONS AND HLA-B*1502 ALLELE. Severe and sometimes fatal dermatologic reactions, including Toxic Epidermal Necrolysis (TEN) and Stevens-Johnson syndrome (SJS), have been reported during treatment with carbamazepine. These reactions usually occur within the first few weeks (commonly 1 to 3 weeks) after starting therapy. Patients presenting with symptoms such as progressive skin rash with peeling, epidermal necrolysis, or mucosal blistering must be hospitalized immediately and carbamazepine discontinued. These reactions carry a high mortality rate.

SECTION 1: THERAPEUTIC INDICATIONS

[Clause CBZ-PI-SEC1.1] Indications: Carbamazepine is indicated for the treatment of partial seizures with complex symptomatology, generalized tonic-clonic seizures, mixed seizure patterns, and relief of pain associated with true trigeminal neuralgia.

SECTION 5: WARNINGS AND PRECAUTIONS

[Clause CBZ-PI-SEC5.1] Dermatologic Warnings and Inpatient Hospitalization: Severe cutaneous adverse reactions (SCARs), such as toxic epidermal necrolysis (Lyell's syndrome) and Stevens-Johnson syndrome (SJS), manifest primarily with severe skin peeling, epidermal detachment, and erythema. Onset is characteristically within 7 to 21 days following drug initiation. Inpatient hospital admission and intensive supportive management are mandatory.

SECTION 6: ADVERSE REACTIONS (LISTED REACTIONS)

[Clause CBZ-PI-SEC6.1] Skin and Subcutaneous Tissue Disorders (Listed): The following cutaneous reactions are officially documented and listed in this approved package insert: (1) Toxic epidermal necrolysis (TEN); (2) Stevens-Johnson syndrome (SJS); (3) Exfoliative dermatitis (characterized by extensive skin peeling, shedding, and desquamation); (4) Systemic lupus erythematosus-like syndrome; (5) Pruritic and erythematous rashes; (6) Urticaria; (7) Photosensitivity reactions; (8) Alopecia.

[Clause CBZ-PI-SEC6.2] Nervous System Disorders (Listed): Dizziness, ataxia, drowsiness, fatigue, diplopia, nystagmus, headache, confusion.

[Clause CBZ-PI-SEC6.3] Gastrointestinal Disorders (Listed): Nausea, vomiting, gastric distress, abdominal pain, diarrhea, constipation, anorexia, dry mouth.

[Clause CBZ-PI-SEC6.4] Hematologic and Hepatic (Listed): Aplastic anemia, agranulocytosis, pancytopenia, thrombocytopenia, leukopenia, elevated transaminases, jaundice, hepatitis.
